

# Emanuel Rojas Ramirez

**FULLSTACK DEVELOPER |**  
**REACT · SPRING BOOT · JAVA**

## **PROFESSIONAL PROFILE**

Fullstack developer with experience building modern web solutions using React, Java, and Spring Boot. Known for being self-driven, detail-oriented, and passionate about writing clean and functional code. I'm looking for my first opportunity as a junior developer or intern where I can contribute from day one and continue developing my technical career in a professional environment.

## **TECHNICAL SKILLS**

### **Technologies I've worked with:**

- **FRONTEND:**  
HTML5, CSS3, JavaScript (ES6), React, Responsive Design, i18next
- **BACKEND:**  
Java, Spring Boot, MySQL, Arquitectura por capas, REST APIs
- **Tools:**  
Git, GitHub, Postman, VSCode, Vercel
- **SOFT SKILLS:**  
Comunicación clara · Pensamiento lógico · Resolución de problemas · Trabajo en equipo

### **Currently learning:**

- Clean architecture with Spring Boot, REST API consumption, TypeScript

## **CONTACT**

## **EDUCATION**

Software Development  
Technician – CESDE (Completed,  
diploma pending)

Systems Engineering – ITM  
(Starts August 2025)

High School Graduate – (Diploma  
and transcript available)

## **Certifications**

+11 courses on Platzi (React, Java,  
Spring Boot, GitHub, etc.)

Inglés nivel B2 (currently  
studying C1)

SENA – Technical degree in  
Commercial Advising

## **LANGUAGES**

Spanish: Native

English: B2 (studying C1)

## HIGHLIGHTED PROJECTS

### Personal Portfolio Website

React · i18next · Responsive

- Professional site with dark/light mode, ES/EN language toggle, and sections like about me, projects, skills, diplomas, and contact.
- Fully responsive and mobile-optimized.
- Click here: <https://emanuel-rojas-page.vercel.app>

### Fullstack Restaurant App

React · Spring Boot · Login · Shopping cart

- Implemented authentication system and cart state persistence using localStorage.
- Backend developed with Spring Boot and layered architecture.

### Subscriptions Management System

React · Hooks · Full CRUD

- System with login, signup, create, edit, delete, and search functionalities.
- Clean interface with form validation and dynamic state management.

### REST API for School

Spring Boot · PostgreSQL · Clean Architecture

- Built a robust REST API using Spring Boot, managing student/teacher data with MySQL.
- Backend tested, documented, and versioned with Git.
